

Nautel Software Bulletin

April 14, 2014

Nautel GV Series V4.0.1 Release Notes

Nautel strongly recommends that customers upgrade to GV version 4.0.1 as soon as possible.

Improvements with this release include:

- Reduces transmitter output power overshoot behaviour when HD data is lost.
- Fixed SBC Watchdog Reset function.
- Prevents transmitter output power from overshooting if the Spectrum/Efficiency Optimizer function is disabled after the system has been optimized.

Nautel Software Bulletin

Recipients of Nautel bulletins will receive information on software updates, product notices and other information affecting users of Nautel equipment.
