Nautel Software Bulletin

June 2, 2014

Nautel GV Series V4.0.2 Release Notes

Nautel strongly recommends that customers upgrade to GV version 4.0.1 or higher as soon as possible.

Improvements with this release include:

- Resolved an erroneous Monitor Fan Fail alarm condition.

The most significant improvements with previous versions include:

Version 4.0.1 – Released April 14, 2014

- Reduced transmitter output power overshoot behaviour when HD data is lost.
- Fixed SBC Watchdog Reset function.
- Prevented transmitter output power from overshooting if the Spectrum/Efficiency Optimizer function is disabled after the system has been optimized.
