

Nautel HDMC+ Series Software Release Notes

HDMC+ Series Software 1.1.0

General Remarks:

HD Multicast+ Software Version 1.1.0 is a relatively minor update which can safely be applied to any existing HD Multicast+ hardware. Updating is mandatory for any customers using the BTC system but is typically not required for others unless the new feature described below is needed.

Please contact Nautel to request access to the required files for the update.

New Features:

- This release includes integrated MSAC clients which can be used to transmit station logo in the absence of an automation system.

Bug Fixes:

- This release fixes a problem which prevented the use of the Broadcaster Traffic Consortium system.

Installation Considerations:

This Software update will take approximately 30 minutes. You will be OFF AIR during the upgrade process.
