

HD Multicast+ Version: 1.1 Software Release Notes

General Remarks:

HD Multicast+ Software Version 1.1 is a relatively minor update which can safely be applied to any existing HD Multicast+ hardware. Updating is mandatory for any customers using the BTC system but is typically not required for others unless the new feature described below is needed.

New Feature:

- This release includes integrated MSAC clients which can be used to transmit station logo in the absence of an automation system

Improvements / Enhancements:

- None at this time.

Removed / Retired Features:

- None at this time.

Bug Fixes:

- This release fixes a problem which prevented the use of the Broadcaster Traffic Consortium system.

Known Issues:

- None at this time.

Workarounds:

- None at this time.

Installation Considerations:

This Software update will take approximately 30 minutes. You will be OFF AIR during the upgrade process.
