

Nautel Software Bulletin

March 14, 2011

Nautel NV Series V3.0.2 Release Notes

On March 14, 2011 Nautel released version 3.0.2

If you have been advised by our customer service department to upgrade or if you have experienced problems addressed in this software release please proceed with the download.

To upgrade to software version 3.0.2, use information sheet IS09004E, assuming you already have a minimum 3.x software in place.

The most significant improvement with this version includes:

- Resolves issue where RF power modules were being inhibited at turn on in HD modes intermittently and not displaying any alarms.
- Improvement made to issue where numerous Module Not Responding Alarms were being displayed in Events Log. Reduced number of events significantly.

Nautel Software Bulletin

Recipients of Nautel bulletins will receive information on software updates, product notices and other information affecting users of Nautel equipment.
