

## General Remarks:

NV Series Software Version 4.4 is a **SIGNIFICANT** Software update suitable for all Nautel NV-Series transmitters. We recommend upgrading your transmitter(s) to this latest release DURING NEXT REGULARLY SCHEDULED SITE INSPECTION.

You can download NV Series Software Version 4.4 [here](#).

Software Upgrade procedures can be found in the *Non-Standard Maintenance* section of your *Operations and Maintenance Manual*. Please be sure to review and understand the complete set of instructions prior to beginning your upgrade.

## New Features:

None at this time.

## Improvements / Enhancements:

- There is a new top-level Nautel MIB file to correct inverted values for true/false values.

## Removed / Retired Features:

None at this time.

## Bug Fixes:

- Resolved a rare "Transmitter Type Not Set" alarm after upgrading very old NV systems.
- Older system logs are now being purged during upgrades, as they provide little value and potentially occupy a lot of space.
- The SNMP system log is now cleared during the upgrade procedure.
- Resolved an SNMP installation issue that was forcing a second upgrade procedure.

## Installation Considerations:

This Software update will take approximately 30 minutes, and may require multiple reboots. You will be OFF AIR during the upgrade process.
