

# Nautel Software Bulletin

March 16, 2011

## Nautel NX Series V2.8.4 Release Notes

On March 16, 2011 Nautel released version NX SW 2.8.4

This software release improves the overall reliability of the transmitter. Nautel strongly recommends this software update be completed as soon as possible.

For Software 2.8 the information sheet to use is IS09005.

The most significant improvements with this version include:

- Two improvements to the exciter based VSWR protection.
  - 1) The duration of the RF drive latch has increased to give more time for stored energy to dissipate after a shutback.
  - 2) A dynamic method has been added to calculate the peak reflected VSWR scale factor for the transmitter.

## Nautel Software Bulletin

Recipients of Nautel bulletins will receive information on software updates, product notices and other information affecting users of Nautel equipment.
