Nautel VS Series V2.0.2 Release Notes

On March 28, 2011 Nautel released version 2.0.2

If you have been advised by our customer service department to upgrade or if you have experienced problems addressed in this software release please proceed with the download.

The most significant improvements with this version include:

- Resolved issue where the upgrade process to VS SW 2.0.1.tgz did not upgrade the server; creating an incompatibility with new SW 2.0.1 components (related symptom was SW version screen did not appear)
- Implemented ability for VS2.5 transmitter to operate in All-Digital HD mode with VSHD
