

# Nautel Software Bulletin

August 17, 2011

## Nautel VS Series V2.0.6 Release Notes

On August 17, 2011 Nautel released version 2.0.6

If you have been advised by our customer service department to upgrade or if you have experienced problems addressed in this software release please proceed with the download.

The most significant improvements with this version include:

- Fixed SNMP port forwarding bug. (ie. changing the port number in the Network Configuration).
- Remote Input configuration fixed.
- Added Remote Input Configuration called 'AUI Reset' which can be used to reboot the host controller. This will not take the transmitter off the air. Most likely use would be if the transmitter does not appear to respond to network access.

## Nautel Software Bulletin

Recipients of Nautel bulletins will receive information on software updates, product notices and other information affecting users of Nautel equipment.
